

Upcoming Field Work Notice – Lawrence Street Combined Sewer Separation Project

As part of the City of Port Townsend's Lawrence Street Combined Sewer Separation Project, the City's geotechnical contractor will be conducting soil borings along Lawrence Street to collect subsurface information that will guide utility and roadway design.

What to Expect:

- Date & Time: Thursday, July 31st from 8:00 AM to 4:00 PM
- Location: Lawrence Street between Harrison Street and Monroe Street
- Activity: Geotechnical drilling using a truck-mounted drill rig and support vehicle
- Impacts: Temporary lane closures and localized parking restrictions. Expect minor delays and intermittent flagger-controlled traffic.

This work will help inform design for anticipated sewer, stormwater, and street improvements as part of the project.

We appreciate your patience as we complete this essential work to improve public infrastructure and protect the environment.
